

ASSIGNMENT 1

TASK1

1 BITWISE OPERATORS- They perform the operation on operands

Bitwise. This includes-

1. (&) bitwise and
2. (|) bitwise or
3. (^) bitwise xor
4. (<<) left shift operator
5. (>>) right shift operator
6. (~) bitwise not

2 TERNARY OPERATOR- This is similar to if else statement and is

Written in shorter way.

Syntax—

Variable=expression1 ? expression2 : expression3

If expression1 results true then value of expression2 will be stored in variable otherwise value of expression3 will be stored in variable.
